Preface

Education statistics provide valuable data and facts about our school system and thus forms a sound basis for the continuous further development and quality assurance of our educational system. Up-to-date figures are important to set the course for innovative and lifelong learning and teaching.

The “Statistical Guide 2011” presents up-to-date figures, data and facts about the school system and adult education in concise and clearly arranged form. Built upon the annually published tables of the number of schools, classes, pupils and students at University Colleges of Teacher Education the “Statistical Guide” provides information about the educational attainment of the Austrian resident population and EU-benchmarks. A new feature this year provides a detailed classification of school types.

The “Statistical Guide 2011” is published in German and English and continues the series of statistical publications of the Federal Ministry for Education, the Arts and Culture.
